

ISendUScan WooCommerce Plugin Quick Setup Guide

A quick guide to set up ISendUScan Verified Delivery Assurance on your WooCommerce store.

Prerequisites

- WordPress admin access
- WooCommerce installed and active
- ISendUScan plugin already uploaded to your site

Step 1: Activate the Plugin

1. Go to **Plugins** in your WordPress dashboard
2. Find "WooCommerce ISendUScan Plugin" and click **Activate**
3. Click **Settings** (or navigate to WooCommerce → ISendUScan Settings)

Step 2: Create Your ISendUScan Account

1. In the plugin settings, click "**Sign Up at <http://ISendUScan.com>** "
2. Complete the registration form with your business information
3. Keep this tab open - you'll need to copy API credentials

Step 3: Connect Your Account

Get your API credentials from <http://ISendUScan.com> :

- Copy your **Merchant ID**
- Copy your **API Key**
- Copy your **API Secret**

Enter credentials in WordPress:

1. Return to your WooCommerce ISendUScan Settings page
2. Paste your **Merchant ID**, **API Key**, and **API Secret**
3. Enter your **Merchant Email Address**
4. Click **Connect**
5. Verify the status shows "**Merchant Account is Active and Ready for Use**"

Step 4: Configure Plugin Settings

Set up how the add-on appears to customers:

- **Enable ISendUScan:** ✓ Check to activate
- **Add-on Price:** Set your desired price if you want to upcharge for the service. (This is added to cart when selected)
- **Checkbox Label:** Customize the text shown at checkout (default is fine)
- **Description:** Update the tooltip text if needed
- **Minimum Cart Price:** Set minimum order value to show the option (optional)

Click **Save Changes**.

Step 5: Test the Integration

Frontend Test:

1. Go to your store's checkout page
2. Add products to cart (above minimum if set)
3. Verify the ISendUScan checkbox appears at checkout
4. Select the add-on and complete a test order

Your order

Would you like Verified Delivery Assurance? (\$2.99) ⓘ

Recipient Email (optional)

Backend Verification:

1. Go to **WooCommerce** → **Orders**
2. Open the test order with ISendUScan tracking
3. Confirm you see a **Verification ID** in the ISendUScan section
4. Click "**Download QR Code PDF**" to test PDF generation

How It Works

For Merchants:

- Customers can opt-in to delivery verification at checkout
- QR code PDF is automatically generated for each order
- Print and include the QR code with shipments
- **⚠ Important:** Don't scan the QR code yourself - this completes the delivery verification

For Customers:

- They scan the QR code upon receiving their package
- This confirms delivery and can trigger rewards/credits
- Provides proof of delivery for both parties

Troubleshooting

Connection Issues:

- Double-check all API credentials are copied correctly and
- Ensure your ISendUScan account is fully activated. Settings in plugin will show say account is ready for use if active.
- Use the "Retry ISendUScan Order" button in order if verification fails

QR Code Not Generated:

- Verify the plugin is enabled and connected
- Check that the order meets minimum cart requirements
- Confirm the ISendUScan add-on was selected at checkout
